Products and services

ITAB - GROUP HOLDING AND UK OPERATIONS

Retailing in the UK is a world class industry, moving at a demanding pace.

ITAB are a well resourced and substantial PLC centred in Sweden, trading through the OMX Stockholm exchange. ITAB operate offices and production centres in seventeen European countries and four sites in the United Kingdom, all dedicated to providing products and services to retailers.

With well over 1.6 million square feet of production and warehouse space, ITAB

manufacture a wide range of shop floor products and provide complimenting shop-fitting services. Service is the core focus of our offer and our project management teams are the key to supporting our very successful client relationships.

ITAB United Kingdom is the coordinating organisation that ensures our production and service centres operate in the full interest of our retailing customers. The UK regional Management team direct the operations of the three large ITAB companies, with the goal of providing a total fit-out solution.

ITAB UNITED KINGDOM COMPANIES

Continuous high retail activity in the UK requires ITAB to constantly innovate and develop new products, often linked to our interior concept schemes. To facilitate retailers needs our operation is built around in house production, procurement and importation from cost effective regions of the world. Combining this offer with professional well resourced and dedicated colleagues ensures that ITAB do provide a comprehensive service.

RETAILER

ITAB SHOP CONCEPT UNITED KINGDOM

The key to our successful retail display fixture operation is our mass produced core display systems..

In-house manufacturing is an integral part of providing a complete service package that meets the needs of UK retailers.

ITAB shop concept UK is a successful and well established organisation in the retail equipment market and our customer base is impressive testimony to the quality and service that the company provides.

Our design capability includes the use of renewable materials that reflects the

ISO14001 environmental accreditation which ITAB holds.

Operating in our own large-scale production unit we are able to produce in volume virtually every type of display fixture and modular shelving. We also retain two large warehouses, to distribute rollout and phased store programmes.

To complement the needs of retailers, ITAB shop concept UK also stocks large volumes of mass-produced 50 & 25mm pitch modular shelving, which is produced in our factory in the Czech Republic. We combine this with a comprehensive procurement capability, whereby we source various products

from the most costs effective regions of the world.

Design is at the very centre of ITAB Shop Concept UK. A number of major retailers contract ITAB to design and produce photo quality imagery, that is used to underpin a total store design & merchandising flow.

Trading directly with significant food and non food retailers, we operate efficient business unit teams who are dedicated to each major client, ensuring that customer service is at the heart of what they do. Each of these business units includes designers and engineers who maintain direct and constructive contact at each stage of devleopment.

ITAB INTERIORS

Floors walls and ceilings are the exciting and living canvas of a retail concept design.

ITAB Interiors provide high quality national build and fit out solutions for both the retail and the commercial sector.

Our operations generally focus on retail units up to 40k sqft and commercial units up to 100k sqft.

Our in-house services include dedicated account and project management, mechanical, electrical, structural steel, lighting, CAD design & planning, all

supported by controlled external trades.

ITAB Interiors have provided a full range of build services to retailers in the United Kingdom for twenty years. This experience has afforded us a strong understanding of the quality and design needs during tight deadline programs.

Our aim is to provide the most cost effective shop fitting services to retailers, incorporating ITAB equipment as a one stop solution.

ITAB Interiors constantly liaise with our manufacturing centre's, to ensure the store design and implementation leads to a seamless and complete store opening.

Our flexible and experienced project management has resulted in many successful concepts and stores of the future, which has underpinned our day to day shop fit activity.

As a professional organisation, ITAB Interiors are members of all the major UK health & safety accreditation bodies. This proven capability and significant group resource allows us to immediately support new retail clients.

ITAB SHOP PRODUCTS UNITED KINGDOM

ITAB Shop Products UK is the only organisation that can provide a complete solution for products that improve shopper flow within retail environment. With an extensive product range that covers the main demands relating to all types of retail fit-out. Often these products can be combined with shelving and construction installations, project managed by a single ITAB team.

As Europe's largest manufacturer of checkouts. This position gives us a wealth of knowledge which is often useful to British retailers. Combined with our self-checkout and customer guidance systems, which use the very latest technology. Delivering an improvement in customer flow by

reducing wait times and improving service times.

Complementing our product display equipment we offer a damage protection and external furniture range that represents high quality and low cost of ownership for our retail customers.

Our service engineers have a wealth of experience and knowledge. Coupled with our in-house technical advice team, we ensure an unrivalled performance in quality of service and maintenance. ITAB field engineers are coordinated by our call centre support team who program works based upon contract agreements, both for major retailers and property management companies.
