NEW - 100% Recycled Plastic Shopping Basket

Our 100% Recycled Plastic Shopping Basket with a glass fibre reinforced handle have been designed to project a modern day image that can easily stand the rigours of the everyday shopping experience.

With the environment in mind these baskets are made from materials that would normally go straight to landfill sites. Going Green with a widely used Shopping Basket is something that we feel will increase the Baskets popularity.

Available in Black these baskets are extremely durable with a choice of either a 20 or 27 litre version enabling high capacity. Logo's can be applied to either short end of the Basket to give a corporate image and offer branding.

Baskets are easy to stack without being bulky and can be nested in a Wheeled or Static Basket
