

## 5 Bar Tread Plate

This is a heavy-duty protection sheeting, suitable for installation in a variety of areas including doors and plasterboard walls.

Due to its extremely high durability, 5 Bar Tread Plate is a favourite protection solution for warehouses, heavy traffic corridors and storage areas.

It is available in various sheet sizes, allowing for a superb level of customisation. Its 3mm thickness offers a unrivalled level of durability and protection

### Design:

- 3mm thickness.
- Three different sizes: 2000mm x 1000mm(11.2kg), 2500mm x 1250mm (17.6kg), 3000mm x 1500mm (25.2kg).
- Made from high-quality Aluminium

### Fixing Guidelines:

- Fix on to Isoclad walls using grip adhesive. No screws to be used
- Full plate to be fixed horizontally onto warehouse corridor walls, sitting on top of skirting top edge
- Sides of doors facing onto corridor to be faced full width x 1830 high
