

Chrome Internal Protection Post

Our highly popular internal protection post offers an unsurpassed combination of form and function for your environment.

Finished at a height of 620mm (including top cap), the post is both generous with its protection and discreet in appearance.

Our internal protection post is perfect for protecting unit corners such as refrigerators or display cabinets. They can also be placed to form highly pleasing demarcation areas.

It is available in chrome, either potted or using our specially designed bayonet fixing for easier installation/removal or surface fixed which comes complete with an attractive domed base cover plate.

Standard and optional features;

Design:

- 75mm diameter
- 620mm overall height
- Fabricated using 304 grade stainless steel.
- Available in chrome plated complete with domed base cover plate or potted into ground
- We also have a Potted Bayonet fixing option (see below) that allows for the action of one swift movement for simple removal

Positioning Guidelines:

- Fixed using M10x80 floor fixings
- Maximum positioning is 30mm from surface to be protected
