

## The Eclipse (Small Smoking Shelter)

Where space is at a premium, our 2m x 2m small smoking shelter allows you to offer the facility of an off-site smoking environment while not compromising on space.

This aesthetically pleasing shelter is manufactured from high grade components and provides a splendid solution for helping to promote a smoke free environment in the workplace, whilst providing smokers with superior protection from all weather conditions. It is fully compliant with the new legislation that is now enforce as of 1 July 2007 across England.

The shelter is constructed from partially recycled aluminium resulting in high resistance to corrosion due to its anodised finish, coupled with low maintenance. The roof is glazed with twinwall translucent polycarbonate sheets (6mm thick) which are secured within the aluminium construction. This gives the shelter unrivaled durability. The side panels are glazed with 5mm UV stable PET.

Units can be easily adapted and installed end-to-end or side-by-side to create larger areas. Other colours are available on request but will be subject to lead times & an additional charge.

The shelter is supplied with all fixings. Top quality 80% recycled plastic seating, signage and cigarette bins are also available as extras.
