

The Lunar - Smoking Shelter

Take a look at our latest addition to our range of compliant smoking shelters. This aesthetically pleasing shelter is manufactured from high grade components and provides a splendid solution for helping to promote a smoke free environment in the workplace, whilst providing smokers with superior protection from all weather conditions and it fully compliant with the new legislation that is now enforce as of 1 July 2007 across England.

Generously proportioned, the shelter is constructed from recycled aluminium resulting in high resistance to corrosion due to its anodised finish, coupled with low maintenance. The aluminium is created from partially recycled material making this shelter not only green for the staff but also the environment.

Units can be easily adapted and installed end-to-end to create larger areas. Other colours are available on request but will be subject to lead times & an additional charge.

The shelter is supplied with all fixings. Top quality 80% recycled plastic seating, signage and cigarette bins are also available as extras.

Standard & optional features;

Design:

- Standard size 4189mm long x 2276mm wide x 2519mm height
- Shelter is constructed from partially recycled aluminium frame
- Finish Anodised at AA5 - Silver
- 'Standard bolt heads' used to ensure a secure fixing
- NEW wedge profile to be fitted inside channels that have PET in them, this ensures a more secure fitting and acts as a dampener on the rattle of the panels in the wind
- Panels are 3mm PET (in between the hoops) and 5mm PET (on the two ends)
- Fully recyclable. Created using partially recycled material in the aluminium and our new style seating is also manufactured using 80% recycled plastic
