

## Radpark

This aluminium trolley shelter main feature is the polycarbonate panel construction. It also has high resistance against corrosion & comes complete with tamper proof fixings. It has a superior quality appearance with concealed edges for glazing. The polycarbonate side/roof panels are clear. Logo panels are also available with lettering included (standard is a Trolley Symbol) - colour choice to match roof ends. The glazing side panels comes as 3mm polycarbonate with 5mm polycarbonate end panels.

Our modular designed shelter is a robust, durable construction and fits into a standard car park space. Installation is simple with no special fixing requirements. Units can be installed end-to-end or side-by-side to create larger areas from greater trolley storage or covered walkways.

It also features built-in interior & exterior crash-rails to protect against trolley or vehicular collision damage.

Standard and optional features;

### Design:

- Standard size 4189mm long x 2276mm wide x 2519mm height
