ITAB SHOP PRODUCTS

Stainless Steel Rail

This low level stainless is one of our most stylish and versatile products. Suitable for both internal and external use, our low-level modular stainless steel provides elegance yet durability with robustness protection for window lines and brickwork whilst maintaining a stylish image. The modular nature of the product allows for easy planning and installation and can be adapted to the most challenging briefs.

As well as being available as floor fixed low level protection, it is also possible to fit this stainless steel rail to columns or walls, at any height.

Standard and optional features;

Design:

- Construction: 51mm x 14swg 304 grade stainless steel
- Surface fixed or potted support foot
- A fully modular system
- Dimensions: Finished height 180 -205mm above finished floor level
