

Trolley Shelter

This aluminium trolley shelter has high resistance against corrosion & comes complete with special tarmac fixings. It has a superior quality appearance with concealed edges for glazing and is low maintenance. The roof is glazed with translucent sheets & is secured within an aluminium frame with steel or aluminium end panels (which can be painted to any RAL colour choice to suit). Logo panels are also available with lettering included (standard is a Trolley Symbol) - colour choice to match roof ends. The glazing side panels comes as 5mm polycarbonate with 6mm polycarbonate roof panels, tinted are available at extra cost. Toughened glass of 4 & 6 mm are also available if required.

Our standard covered trolley shelter is a robust, durable construction designed to fit a standard car park space. The shelter has the added benefit of being able to be bolted to tarmac with no structural ground works required as we use special tarmac fixings, which makes this shelter very cost effective and very simple to install. Units can be installed end-to-end or side-by-side to create larger areas for trolley storage.

It also features a trolley harness rail and interior & exterior crash-rails to protect against trolley or vehicular collision damage.

Standard and optional features;

Design:

- **“Trolley Shelter can be surface fitted to standard car park tarmac surfaces with no structural ground works”**
- Standard size 4334mm long x 2360mm wide x 2200mm height
- Shelter is constructed from aluminium and steel with PET side/end panels
- Polyester finish and comes in white as standard, other colours are available on request
- 4334mm roof overhang is constructed of polycarbonate roofing sheets
- Internal trolley harness rail is installed for guidance and protection of trolleys
- Interior and exterior crash rails are fitted to protect against trolley or vehicular damage
- Special guttering extrusion with clever attachment built-in which holds heads of the bolts
- Special locking nuts - so no visible bolt heads shown
- Optional back end panels also available + hitch rail to be used with trolley locks
- Galvanised steel trolley harness rails
- Materials used for the roofing and side panels comply with Flammability Classifications BS 476/7 for the roofing sheets and UL94 (rating V2) for the side panels. Both are self extinguishing

Order Information

Can be supply only or installed by our Installation team. Please specify at time of order any additional extras the Trolley Shelter may need
