

Wheel Protection Post

The Wheel Protection Post is one of our most popular protection solutions.

Widely used in retail environments, it is perfect for protecting fittings such as chiller cabinets and shelving units.

Each post stands 700mm high, with a post diameter of 48mm. The wheels have a diameter of 165mm, resulting in a post that encourages any colliding vehicles to roll away undamaged. Even the chrome post itself is protected and any damaged wheels can easily be replaced giving a proficient and cost-effective protection solution.

The Wheelie Protection Post is also available in a range of colours to suit.

Standard and optional features;

Design:

- Height 700mm, diameter 48mm (wheel diameter 165mm)
- All posts are finished in chrome with standard wheels which come in Mid Grey, Red or White
- Weight 8kg
- Use 4 x M10x80 fixings
